GREENLEE. A Textron Company MADE FOR THE TRADE!™

HOLE SAW, VARIABLE (6")STD PK 5

Bi-Metal Hole Saws

Cat No: 52063316

UPC No: 783310034810

Description

- Cut through steel, tin, aluminum, fiberglass, wood and plastic
- Deep 1-5/8" (41.3 mm) cutting depth allows for cutting through 2" x 4" wood studs
- Extra-tough bi-metal blade. We use the highest grade of tool steel to outlast competitor's blades. That beats premature saw replacement and saves you money
- Steam oxide finish no paint to gum up and slow cutting. The saw runs cooler for longer life and better performance
- Extra-thick backplate minimizes vibration for smoother, easier, less tiring cutting
- Made in USA

Specifications

- Type : Variable Pitch
- Hole Diameter : 6"
- Material : Bi-Metal
- Use With Quick Change Arbor No. : 02801
- Use With Standard Arbor No. : 37156
- Package : 5/Standard Pack
