

Main Filter: HEPA H13 Particle Filter and wide band gas filter (50% Activated Carbon, 50% Potassium Permanganate) for Zero Smog 4V (also fits WFE 2S)

Item No: T0058735936N
Main Filter: HEPA H13 Particle Filter and wide band gas filter (50% active carbon, 50% Potassium Permanganate) for Zero Smog 4V (also fits WFE 2S)

KEY FEATURES

- Main filter comprising a HEPA class H13 particle filter + granulated media
- Ideal filter for Soldering, Laser, Beauty Salons, and Gluing applications
- Also fits Zero Smog EL, TL and WFE 2S filtration units
- 2,2kg of granular media
- 50% Activated Carbon, 50% KMnO4 (Potassium Permanganate)
- This 50/50 mixed media is the best solution for soldering since fluxes contain so many varying and harmful chemicals
- Lightweight and environmentally friendlier construction for easy handling and disposal
- Includes a small silicone hose and connector. This is used by the Zero Smog 4V to measure differential pressure through the filter to know when the filter is full. The EL and TL units use a different system and this tube can be ignored when installing in these filtration units

TECHNICAL DATA

Dimensions L x W x H	285.0 x 285.0 x 175.0mm
ESD Safe	Yes
