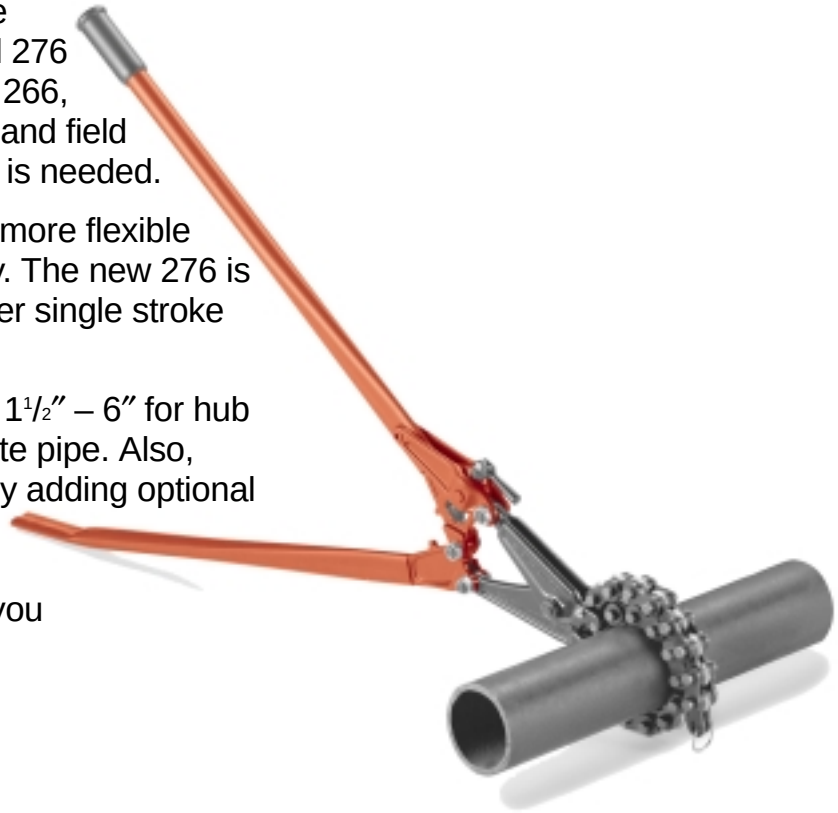
Model 276 Soil Pipe Cutter

Ridge Tool is pleased to announce the introduction of the single stroke Model 276 Soil Pipe Cutter. Replacing the Model 266, the Model 276 is a great tool for shop and field use, especially when repeated cutting is needed.

The Model 276 features a lighter and more flexible chain that improves the tool's usability. The new 276 is easier and safer to hook than any other single stroke snap cutter in the market.

The Model 276's standard capacity is 1½″ – 6″ for hub and no hub cast iron, clay and concrete pipe. Also, users can extend the tool's capacity by adding optional chain links or even an additional chain assembly. The new Model 276 offers the versatility and ruggedness you expect from a RIDGID tool.



Model 276 Capacity

Type of PIpe	Pipe Size in Inches	
	Standard Capacity	Maximum Capacity
Clay Pipe	1½″ – 6″	1½″ – 15″
No Hub Cast Iron	1½″ – 6″	1½″ – 8″
Service Weight Cast Iron	1½″ – 6″	1½″ – 6″
Extra Heavy Cast Iron	1½″ – 5″	1½″ – 5″
