

Model 22

HOT

WOODFORD 22 SERIES HOT/COLD WALL FAUCETS

COLD

Now, the convenience of year-round outside cold and hot water is easy, reliable and maintenance-free.

Woodford models 22 and V22 are freezeless, anti-rupture, and drain automatically with the hose removed. Our patented Pressure Release Valve (PRV Stem) releases at approximately 300 psi, eliminating the chance of pipe rupture.

We've also improved water flow and added long-lasting, more ergonomic powder-coated oval handles. And Woodford quality comes at no extra charge.

Model V22

BECAUSE MAN

DOES NOT LIVE BY COLD WATER ALONE.
