Home Theater and Multi-Room Wallplates

APPLICATION

The Leviton Architectural Edition Home Theater Interface and the Multi-Room Install Wallplates combine the convenience of a ready-made plate with pre-configured wiring terminations with exceptionally high-quality "audiophile-grade" connectors. Both plates are intended for installation 12" off the base of the floor and typically will be placed behind the equipment rack, in a cabinet or behind the entertainment center.

FEATURES AND BENEFITS

• Both include painted screws to match wallplates

• Designed for easy installation of cables

• Wallplates feature two QuickPort openings for adding other connectors (QuickPort blanks installed)

• For use with low voltage rings and standard low voltage junction boxes

• AEHTK Home Theater Interface Wallplate only

• Accommodates from 5.1 to 7.1 channel surround-sound systems which connect to the A/V Receiver

    5.1 = FrontR, FrontL, Center, BackR, BackL, and Subwoofer
    6.1 = Same as 5.1 plus Center Back
    7.1 = Same as 5.1 plus Back Left Surround/Back Right
           Surround

• Features two QuickPort snap-in openings for adding other connectors (such as video connectors)

• Features RCA connectors for connecting subwoofers

• AEMRK – Multi-Room Stereo Speaker Wallplate only

• Integrated wallplate for connecting Left and Right Audio Speakers (+/- connections), and 2 extra openings for additional QuickPort connectors (ex: adding a subwoofer)

Home Theater Interface Wallplate (Cat. No. AEHTK)

Multi-Room Wallplate
