LEVITON

FRONT & REAR WITH DESIGNER COVER

High Capacity 8" Versi-Duct® Cable Management System

INNOVATIVE 8" VERTICAL CHANNEL

Leviton now offers an 8" vertical cable management system, developed for use in today's large scale deployments and CAT 6A installations. Designed to fit any standard equipment rack, this innovative system uses a small number of accessories to achieve a wide range of cable management solutions. Versi-Duct is the ideal system for efficient, adaptable rack and frame cable management.

VERSI-DUCT 8" CHANNEL FEATURES

- Injection molded products eliminate sharp edges and protect cable integrity
- Durable ABS plastic channels withstand years of use in demanding environments
- Large finger pass-through space aligns with rack units
- Included cover features unique, integrated dual-hinge for easy accessibility and maintenance
- The 80" long channel ships in two 40" pieces for easier handling and installation
- Front only or front/rear configurations
- Channels kitted with cable retainers, slack loop organizers, center mounting brackets, and covers
- Same channels can be easily adapted for side or center mount applications
- Center mounting brackets snap into vertical channel with no additional hardware required

VERSI-DUCT ACCESSORIES

- **Slack Loop Organizers** store cable slack and maintain proper bend radius for CAT 6A applications
- **Cable Retainers** snap into multiple positions along channel fingers to secure cable bundles
- **Center Mounting Brackets** may be used to center mount channels between two racks
