

# Secure RJ Copper System

## Provide physical security for critical network ports with Leviton’s patent-pending Secure RJ System.

Introducing the ideal category-rated system for sensitive network applications. Locking patch cords and port blockers in your choice of eight colors prevent unauthorized and unintentional port access. Once connected to an industry-standard RJ port, a matching color extraction tool is required for removal. The applications are virtually unlimited. How will you use the Secure RJ System to protect your network?

- Use multiple colors to reserve, identify, and segregate networks in data center, TR/ER, and work area applications
- Prevent accidental or unauthorized moves, adds, or changes in mission critical circuits, including SIPRNET and JWICS government networks, and proprietary and colo data centers
- Ensure continuous connectivity for essential networks, including data center, goverment, educational, retail, financial, and healthcare
- Install patch cords with Secure RJ housing on one end only to prevent theft from hotel rooms, libraries, computer labs, and other publicly used networks
- Help retail establishments prevent unauthorized access to point-of-sale (POS) terminal data ports.

### Secure RJ System Components

Available in CAT 6 and 6A, in standard configurations or customized through Leviton's extensive make-to-order (MTO) program.

### System Features

- Patent-pending locking mechanism cannot be released without matching color extraction tool
- Port blockers prevent unauthorized network connection via ports not currently in use
- Compatible with industry standard RJ ports in network equipment, devices, patch panels, and work area outlets
- Single system is compatible with all flush and most recessed RJ ports
- Works with high-density network equipment and 1RU 48-port patch panels
- Available in eight color options to reserve, identify, segregate, and secure network ports
- Transparent polymer housing allows color coding without blocking visibility to Link/Status LEDs on electronic equipment
- Made in the United States options available

Note: System does not prevent malicious removal

Cable Assembly Operation

- Only extraction tools with the same keyed color as the Secure RJ connectors can remove patch cords
- Extraction tool features easy push-pull motion to remove connectors, even in high-density patch panels

Installed Secure RJ Patch Cord

Uninstalled Secure RJ Patch Cord

Secure RJ Extraction Tool

Rack/Cabinet Mount Application

- Compatible with all industry standard RJ ports
- Works with 110-style and QuickPort® modular panels

Shown above with Leviton QuickPort modular panel

Work Area Application

- Use with QuickPort connectors for work area applications including standard faceplates, surface-mount boxes, and modular furniture faceplates

Patch Cord Housings
