

Back & Side Wired Surge Protected Receptacles

Cat. No. 5380-IG

Cat. No. 5280

Cat. No. 7280

APPLICATION

Catalog Numbers Series 5280 and 5380 and 7280 and 7380 duplex receptacles provide hard-wired, point-of-use surge protection for electronic equipment used on 15 Amp and 20 Amp 125 Volt branch circuits. Both receptacles are available in conventional ground and Isolated Ground (-IG) versions.

TYPICAL SPECIFICATION

Catalog Number Series 5280 & 5380 and 7280 & 7380 duplex receptacles are designed for use where transient voltage surge suppressors are specified and hard-wired devices are preferred. The receptacles come with matching-color wallplates and are suitable for a wide range of industrial, commercial and residential applications. MOV-based circuitry provides surge protection for normal and common modes (phase-neutral, phase-ground and neutral-ground). The 5280/5380 series are provided with a LED indicator which monitors surge suppression status. The 7280/7380 series are provided with LED and Audible indicators. The audible alarm can be disabled by a set-screw located under removable label on the device face. The receptacles have been tested to ANSI/IEEE C62.41 standards for Category A and B environments and are UL 1449 (2nd Edition) Listed. The devices are also backed by Leviton's Limited Ten-Year Warranty.

PRODUCT MAINTENANCE

5280/5380 Steady, green LED indicates that the unit is powered and protection is active. If the light is off, protection is NOT active and receptacle should be replaced. In addition, the 7280/7380 employs audible alarm with disable feature.

FEATURES

- Ideal for point-of-use surge protection in industrial, commercial and residential applications
- Normal and common mode surge protection (line to neutral, neutral to ground, and line to ground)
- LED monitor/indicator light shows protection status at a glance
- Decora designer-style receptacle complements any interior and coordinates with Leviton's complete line of Decora wiring devices. Single-gang matching wallplate included.

PHYSICAL SPECIFICATIONS

Housing	Impact-resistant thermoplastic
Physical Dimensions	Designed for standard, single-gang wallbox
Mounting	Mounting screws, matching wallplate included
Wiring	Back and side wire terminals accept 14 – 10 AWG conductors
Operating Temperature Range	-10° to 60°C
Storage Temperature Range	-20° to 85°C
