ROMAX® Compact
Cordless Press Tool

ROTHENBERGER pipetool technologies at work

ROMAX COMPACT
CORDLESS PRESS TOOL

Six tons of power in the palm of your hand.

The ROMAX Compact lightweight, battery-powered press tool weighs only 5.4 lbs. and connects 1/2", 3/4" and 1" copper tubing in about 6 seconds. A slim profile allows for one hand operation of the tool while the other hand is free to hold and position the fitting. Interchangeable press jaws rotate 350 degrees and automatically release when the press is complete. Its straight design and slim profile is like an extension of your arm that easily reaches into tight spaces.

When a press is complete, the jaws automatically release signaling that the tool is ready for the next press. If the press jaws need to be opened before a press is complete, the operator can simply push a hydraulic release button on the backside of the tool.

Features

- Slim profile and light weight allows for one-hand operation
- Jaws automatically release when press is complete
- Interchangeable jaws rotate 350 degrees
- Two batteries, 120 volt battery charger and molded carrying case included
