

## ***Cleaning Products for Clothes Dryer Vent / Pellet Stove Flues***

***Capitalize on consumer demand to increase heating efficiency of clothes dryers and pellet stoves with these new Target products from Mill-Rose.***

**T**arget offers everything needed to profit by consumer demand to increase heating efficiency of clothes dryers and pellet stoves. A complete selection of cleaning brushes and accessories are offered for commercial and residential applications. Eye-catching point-of-sale packaging includes complete DIY instructions and lets contractors and do-it-yourselfers serve themselves.

**Clothes Dryer Vent Brushes:** All clothes dryers permit some lint to pass through lint filters. Lint accumulates in the vent restricting air flow and creating a fire hazard. Reduced air flow in a dryer lowers heating efficiency and lengthens the time required to dry clothes. Clothes dryer vents are more fragile than rigid metal pipe and ducts. Soft, synthetic fiber Target brushes are designed to remove lint build-up without damage to vents. For heavy lint build-up in commercial dryer vents, stiff, more aggressive fiber brushes are suggested.

- **Clean your dryer vent or pellet stove flue with ease!**
- **Avoid Fires** • **Save Money!**
- **Improve Heating Efficiency**
- **Eye-catching P-O-P Packaging**
- **Complete DIY instructions with each package**

### **Pellet Stove Cleaning Brushes:**

Soot and creosote form in flue walls and elbows. Excessive soot or creosote build-up reduces heat energy output and drafting efficiency of the flue and serves as a fire hazard.

Target Fiber brushes work best for soot removal in pellet stove flues, while stainless steel wire brushes are best suited for creosote removal.

### **Flexible Extension**

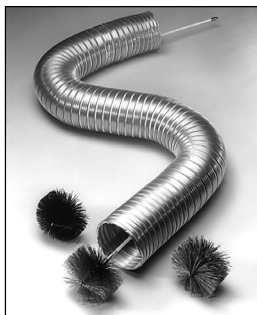

**Rods:** Target flexible extension rods and cleaning brushes (1/4"-20 male/female thread) are designed to negotiate 90° joints in most

vents and flues. In many cases, vents and flues can be cleaned without disassembly.

***New! Consumer packaging shows and tells how to do it!***
