**NOTE:** F-910 made to 125 lb. Flange dimensions.

F-960 made to 250 lb. Flange dimensions.

**A** Wafer Style Butterfly Valve can be mated on the down stream side of the F-910 2½"-10" sizes without use of spacers or adapters. 316 Stainless Steel Trim available – Consult Factory.

**USE THIS VALVE ONLY WITH FLAT FACE FLANGE AND FULL FACE GASKET.**

**WARNING:** 1. Seat end of valve must be mated to a standard flat faced metal flange. Rubber flanges not acceptable.

2. These are not to be used as steam valves.

3. Valves are not to be used near a reciprocating air compressor.

4. Install 5 pipe diameters minimum downstream from pump discharge or elbows to avoid flow turbulence. Flow straighteners may be required in extreme cases.

**Note:** On pump discharge, the preferred check valves are:

- inline, spring assisted, center-guided, lift checks

- spring assisted twin (double) disc

- swing design with lever and weight or lever and spring

You should also install the check valve as far from the pump as possible and at a minimum length of 5 times the pipe diameter. Flow straighteners may be required.
