

Multimedia Outlet System HDMI® Module Female to Female

APPLICATION

Leviton's Multimedia Outlet System (MOS) HDMI Module adapts an HDMI feedthrough connector to the modular MOS wallplate. HDMI is ideal for HD displays in classrooms and boardrooms and where local input or output is required for HD signals from peripherals such as televisions, DVD players, and game consoles.

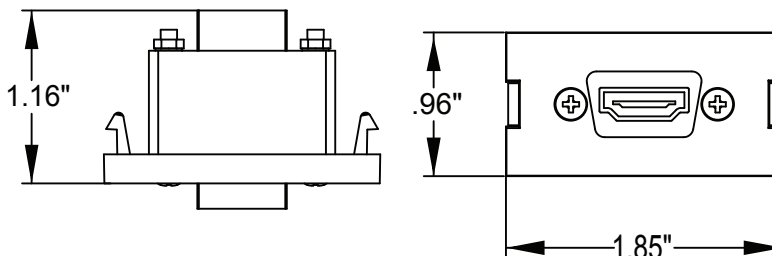

SPECIFICATION

Each HDMI module shall provide audio and video transmission for applications where local input or output is required for HD signals from peripherals such as televisions. The HDMI module shall be available in five colors and shall offer uncompressed signals. The HDMI module shall provide an HDMI female-to-female feedthrough connection.

STANDARDS COMPLIANCE

cULus listed
UL 1863
CSA C22.2 No. 182.4

FEATURES

- Provides HDMI audio and video signal transmission
- Uncompressed signals
