Series BP30

Diaphragm Operated By-Pass Control Relief Valves

Size: 1/2" (15mm)

Series BP30 Diaphragm Operated By-Pass Relief Valves regulate liquid pressure as supplied by a positive pressure pump. These relief valves protect equipment by opening at desired setting and allowing excess volume to be bypassed back to source. They feature bronze body construction, sensitive rubber diaphragms, and Buna-N discs.

The tee handle facilitates pressure change. The spring and adjustment handle are free from contact with liquid elements being controlled. The maximum temperature for this series is 180°F (82°C).

Features

- Rugged bronze body
- Sensitive rubber diaphragm
- Tee handle
- Spring and adjustment handle separated from liquid elements

Pressure Ranges

Maximum Temperature 180°F (82°C)

BP30 - Adjustable Opening Range 10-50psi (.1-3.4 bar)

BP30 - Adjustable Opening Range 45-100psi (3.1-6.9 bar)

BP30 - Adjustable Opening Range 75-175psi (5.2-12.1 bar)

Materials

Body: Bronze

Diaphragm: Buna-N

Disc: Buna-N
