# Plastic Filter Housings

## Top Quality and Economical Plastic Filter Housings

### Single Cartridge Filter Housings

Sizes: 1/4" – 1 1/2" (6 – 40mm)

Our poly filter housings are manufactured from the highest quality, FDA grade, 100% polypropylene and acrylic styrene (for clear housings). Leak-proof sealing is accomplished by compression against a top seated EPDM O-ring located in the housing's sump. Thick wall and added ribs make the housings ideal for a wide range of applications. Polypropylene construction provides excellent chemical resistance in most installations environments. Housings supplied with and without pressure relief valves. See specifications table for pressure and temperature ratings.

### Full product line

We offer a complete line of poly filter housings for virtually every application where single cartridge housings are typically used. Select from standard, heavy-duty, full-flow, high-purity, high-temp and valve-in-head models.

### Features

- Full product line for more types, models, pipe fittings and options
- Heavy-duty construction, made using high-quality FDA grade polypropylene
- Superior chemical resistance from many aggressive chemicals
- Buttress thread design for superior security
- Thick side walls with heavy-duty ribs to provide greater strength
- Temperature rated to 125°F (52°C)
- Cap, sump and top-seated O-rings compress to provide leak proof sealing

See specifications table for more details.

**Note:** Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

## PURE WATER

**Buttress thread design —**  
Provides greater security

**Heavy-duty construction —**  
Housings are made entirely  
of the highest quality FDA  
grade polypropylene

Specifications

Material: sumps & caps	FDA grade polypropylene.
Material: O-rings	EPDM is standard; Viton is available as a spare part.
Maximum temperature (standard)	125°F (52°C)
Maximum temperature (high temp)	200°F (93°C)
Minimum temperature	40°F (4°C)
Maximum pressure (standard)	125psi (8.75 bar)
Maximum pressure (full flow)	90psi (6.3 bar)
