

V-101 and V-101C Atmospheric Type Vacuum Breakers

The Cash Acme V-101 Atmospheric Type Vacuum Breaker is designed to prevent polluted water from being siphoned back into the potable water supply.

The Cash Acme V-101 is a sturdy valve with a good flow rate and an unusually low pressure drop.

- Prevents polluted water from being siphoned back into the potable water supply: *Required for open tanks, basins, sprinkler systems and dishwashers.*
- Equipped with a lighter than water poppet assembly with a specific gravity of less than one: *Provides maximum buoyancy, prevents sticking and keeps spillage to an absolute minimum.*
- Listed by ASSE, CSA and IAPMO: *Inspector friendly, peace of mind!*

TYPICAL INSTALLATION

An atmospheric type vacuum breaker shall be installed to prevent back siphonage of contaminated water. The valve shall be bronze with a silicone rubber seat.

V-101 and V-101C Atmospheric Type Vacuum Breakers
