

E-56 Piston Type Pressure Regulating Valve

The Cash Acme E-56 Pressure Reducing and Regulating Valve automatically reduces a high inlet pressure to a lower delivery pressure and maintains the lower pressure within reasonably close limits.

The Cash Acme E-56 is designed for water, air, light oil, gases (except steam) and other fluids not corrosive to bronze.

- Large commercial and industrial water or air service installations: *Exceptional high capacity for all services.*
- Balanced piston design: *Provides for closer regulation and quiet performance.*
- Every valve is tested for performance prior to shipping: *Specify and install with confidence!*
- Simple, dependable construction: *Fewer parts for greater reliability.*
- Available with threaded or flanged ends: *Flexibility in installation.*

TYPICAL INSTALLATION

The high capacity E-56 regulator is ideal for supply to large usage facilities such as factories and industrial establishments.
