

E-3 and E-41 Pressure Regulating Valves

The Cash Acme E-3 and E-41 Pressure Reducing and Regulating Valves automatically reduce a high inlet pressure to a lower delivery pressure and maintain the lower pressure within reasonably close limits.

The Cash Acme E Series 3 is designed for use where supply line inlet pressure does not exceed 300 psi and is suitable for either cold or hot water service for a variety of applications. Similar to the E-3, the Cash Acme E-41 comes without an inbuilt strainer for conditions that do not require their use or where separate or individual strainers are preferred.

- Automatically reduces a high inlet pressure to a lower delivery pressure: *Maintains a lower pressure within reasonably close limits.*
- Every valve is tested for performance prior to shipping: *Specify and install with confidence!*
- Solves problems of water hammer, pipe noise and rapid wearing of fixtures, faucets, and valves: *Longer life of the valve saves money and time!*
- Listed by ASSE 1003 and IAMPO: *Inspector friendly, peace of mind!*

TYPICAL INSTALLATION

The **E-3** and **E-41** pressure regulators should be installed in the horizontal position with the spring chamber upright. For other installation requirements, consult the factory.
