PIPE ROLLS & SADDLES

Fig. 177

PH-8.16

Size Range: 1" through 30"

Material: Cast iron roll and sockets; steel roll rod, continuous thread rods and hex nuts **Finish:** Plain, Zinc Plated (Hot-Dip Galvanized optional) or Resilient Coated **Service:** For support of pipe where longitudinal movement due to expansion and contraction will occur and where vertical adjustment up to 6" may be necessary. **Maximum Temperature:** 400° F at roller, 300° F at Resilent coated roller.

Approvals: Complies with Federal Specification A-A-1192A (Type 41), *WW-H-171-E (Type 42)*, ANSI/MSS SP-69 and MSS SP-58 (Type 41).

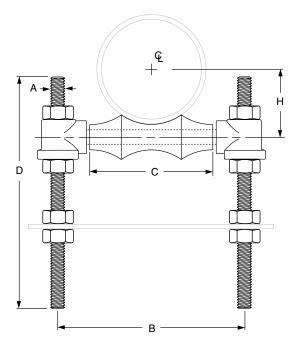

Installation: Normally used directly above steel beams, brackets angles, etc. **Features:** Advantages of pipe rollers with a protective resilient coated covering.

- reatures: Auvantages of pipe rollers with a protective resilient coated covering.
- Non conductive pipe rollers prevent the passing of current from pipeline to structure.
 Corrosion resistant for protection against severe weather conditions, moderate corrosive conditions.
- Corrosion resistant for protection against severe weather conditions, moderate corrosive conditions such as marine atmospheres and weather resistant to ultra-violet radiation.
- Low coefficient of friction between pipe and resilient coated pipe roller.

How to size:

- (1) If roll is to support bare pipe, select the size directly from nominal pipe size (see below).
- (2) If used with pipe covering protection saddle, see Figure 160 to Figure 166A for size of pipe roll.
- (3) If roll is to support covered pipe, the O.D. of the covering should not be greater than the O.D. of the pipe for which the roll was designed.

Ordering: Specify size of roll, figure number and name. Be certain to order oversized rolls when insulation and protection saddles makes this necessary.
