

### INSTALLATION INSTRUCTIONS

The APOLLO RVW16 Pressure Relief Valve is to be installed for system over-pressure protection. This valve is not intended for steam service. CAUTION - During operation, this valve may discharge large amounts of high pressure, hot liquid. To reduce the potential for bodily injury and property damage, a discharge line must be installed that:

1. is connected from the valve outlet to a safe point of discharge, with no intervening valve;
2. allows complete drainage of the valve and discharge line;
3. is independently supported and securely anchored to avoid stresses on the valve;
4. is as short and straight as possible;
5. terminates freely to atmosphere where any discharge will be clearly visible and is at no risk of freezing;
6. is of a pipe size equal to or greater than the valve outlet.

**CALIFORNIA PROP 65: WARNING:** Cancer and Reproductive Harm -  
[www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

**FOR NON-LEAD FREE VALVES:** It is illegal to use this product in the United States for potable water services (water intended for human consumption).

**FOR LEAD FREE VALVES:** This product complies with U.S. Safe Drinking Water Act (SDWA). Suitable for potable water applications intended for human consumption.
