Made in USA 

NEW!

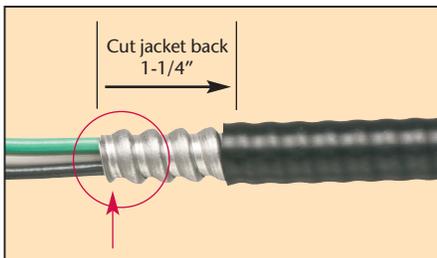

for PVC Jacketed MC Cable • One Fitting Fits Multiple Cable Sizes

NEW!
Ideal for
Parking Decks

LTMCS0
Components

ONE fitting FITS THREE cable sizes!

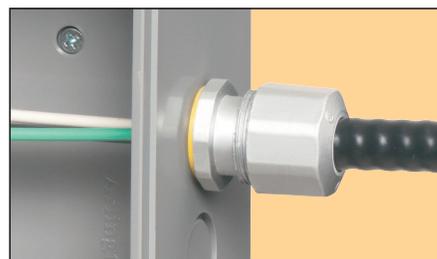

1 Remove sharp edges from end of MC cable. Cut 1-1/4" off the PVC jacket to prepare cable for installation of fitting.

2 Determine which grommet to use. When assembled, push cable into fitting.

3 Cable installed in fitting. Tighten nut.

4 Install assembly in box

Save time and money with Arlington's liquid-tight, concrete-tight zinc fittings for PVC jacketed MC cable. They come with grommets and washers that allow this **SINGLE fitting to fit three cable sizes!**

The 1/2" LTMCS0 ships ready to install on #12 or #14 PVC jacketed MC cable. For installations on #10 cable, substitute the WHITE grommet and washer. It's FAST and EASY!

Because they fit more than one cable size, these cable fittings reduce inventory, saving you the cost of stocking several different fittings.

- Heavy-duty zinc diecast construction
- 1/2" trade size
- UL Listed
