FLBC4502

**THREE options** for low voltage divider positioning

Arlington's FLOOR BOXES, COVER KITS, and accessories **FOR NEW CONCRETE** are the low cost, *convenient* way to install a receptacle *flush with a new floor*.

Made of heavy-duty plastic, our **NEW** FLBC4502 4.5" non-metallic **concrete floor box** has more! – SIX conduit hubs and FOUR plugs. And THREE options for positioning the low voltage divider in the box.

The **NEW** FLBC4502LR **leveling ring** makes installing a cover easy on ANY 4.5" concrete box including our FLBC4500 and the new FLBC4502. **It's REVERSIBLE!** Side A fits any 6" round cover with a 3-1/2" screw hole pattern. Side B has a second set of holes that fits 6" covers with a 3-3/8" screw hole pattern.

Arlington offers a variety of **cover kits** to fit our concrete boxes – Round with flip lids or threaded plugs in brass or nickel-plated brass. Metal trapdoor covers with three device options. *And in plastic, in six colors.*

Get a great-looking, time-saving receptacle installation *in new concrete* with floor box kits, covers and more - from Arlington!

### EASY TO INSTALL CONCRETE BOXES

- 1 Set concrete floor box into position. Secure in place through molded mounting ears. Option: Use 1/4-20 screws to level/position the box.
- 2 Install conduit as needed using PVC cement. Pull wires through conduit as required.
- 3 Install plugs (provided) w/ PVC cement to seal unused openings.
- 4 Install pour cap. Pour concrete to finished depth.
- 5 After concrete has cured, remove pour cap. Use a saw to cut box to finished floor height.

**Complete the installation with a leveling ring and one of these cover trim kits.**

FLB6230MBLR  
Includes brass cover with flip lids, gaskets, receptacle, leveling ring.
