## FOR NEW CONCRETE

### EASY INSTALLATION • FOR FLUSH-TO-THE-FLOOR RECEPTACLES

The cost-effective FLOOR BOX KITS, COVER TRIM KITS and ACCESSORIES in *this brochure* are designed for **new concrete**. They offer installers the low cost, convenient way to install a receptacle flush in a new concrete floor.

Made of heavy-duty plastic, our round *or rectangular* concrete boxes deliver flexibility and convenience.

The 4.5" diameter concrete boxes are a common size that accommodate *our* 6" covers as well as most *other manufacturers'* round covers. They're available with flip lids in plastic – or metal. There's even a recessed cover, IN BOX™, that keeps plugs inside the box to eliminate tripping.

They install fast – and look great!

For the *fastest* installation, our trapdoor covers ship ready to use with a pre-installed gasket and decorator-style receptacle.

A selection of leveling rings and adapters allows our covers to fit not only our boxes but most other manufacturers' concrete boxes as well. Try the combination leveling ring/box extender if you have an installed box that's set too low in the floor. It extends the box up to 1-1/2 inches. *Easy!*

Arlington manufactures a complete line of floor box kits, boxes, covers and accessories for a variety of applications and jobsite conditions. *Visit our website to see them all.*

# GANGABLE BOX KITS

RECTANGULAR NON-METALLIC BOX • METAL COVER KITS

Arlington's UL Listed gangable concrete floor boxes offer installers the economical, convenient way to add receptacles in a new concrete pour in commercial installations.

Build the box you need! Use the single gang box 'as shipped' or lock them together to build a two- or three-gang box. You pick. Then buy the cover kit that fits.

- The gasketed brass or nickel-plated brass frame mounts to the box with screws we supply.
- Metal covers with gaskets then attach to the frame.
- No water intrusion; devices are protected when not in use.

## SINGLE GANG FLOOR BOX KIT

CATALOG NUMBER	UPC/DCI/NAED MFG. #018997	DESCRIPTION	COLOR/MATERIAL	UNIT PKG	STD PKG
FLBC8500	22950	Single gang box kit Individual boxes lock together to form two-gang and three-gang box	Non-metallic Gray	1	5

Includes concrete box, (2) 1-1/4" plugs, mud cover.

## HERE'S HOW IT WORKS

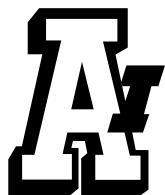

Connections on opposing sides allow boxes to lock securely together

**Modular Interlocking Boxes!**

Combine two FLBC8500 boxes together for a two-gang box

Need a three-gang box instead?  
Add another FLBC8500!

# IN BOX™ RECESSED COVER KITS

FOR FLBC4500, FLBC4502 AND...

Arlington's recessed IN BOX™ COVER KIT gives installers the best way to install a receptacle in a new concrete floor.

This recessed cover installs in our FLBC4500 or FLBC4502 concrete box so it looks great! And, it reduces the trip hazard caused by plugs sticking out of the box.

You can also have a power and low voltage device in the same box. Talk about convenience!

## IN BOX™ COVER KITS WITH METAL COVER
