

Tub/Shower Systems

**CHICAGO
FAUCETS**
Geberit Group

The best commercial tub/shower systems.

We make the number one commercial faucet in the United States. We can bring that same commitment to quality, knowledge, and support to your tub and shower applications.

Our tub/shower systems are designed to match your unique needs, design, and budget. From our pressure balancing valve to our two thermostatic/pressure balancing valves you can count on consistent, durable, and dependable shower performance.

Each valve is engineered to provide a consistent, safe temperature range for your application and is designed to help reduce the risk of scalding. Like all Chicago Faucets, our line of shower valve products are manufactured specifically for commercial applications and are ideal for education, healthcare, hospitality, multi-family, and fitness applications.

Choose from six valve designs to meet your application.

Pressure Balancing

Our pressure balancing shower valve is designed to respond immediately to changes in hot or cold water pressure to provide a safe, comfortable shower. If either supply pressure fails, the valve will shut down instantaneously. A proven, dependable ceramic cartridge is housed in a rugged, brass body.

Thermostatic/ Pressure Balancing

Our thermostatic/pressure balancing valve provides protection against changes in both pressure and temperature. Using advanced thermal actuator technology, it maintains a consistent temperature and can compensate for fluctuation in pressure and temperature change.

Shower System with Integral Automatic Drain

This system is designed to help reduce the growth of pathogens by removing stagnant water in the shower valve, pipes, and hoses of the shower. Drains integrated into the valve and hand spray hose automatically flush water out of the system after each use.

Shower System with Separate Automatic Drain

Helps reduce the growth of pathogens in the shower system by reducing stagnant water in the shower valve, pipes and hoses of the shower system. A separate drain is added to our thermostatic/pressure balancing shower valves to offer additional design options.

Ligature Resistant Shower Valve Trim

Chicago Faucets offers the added safety of ligature resistance with the durability of heavy-duty, brass construction. The mixing handle on this system features a rounded and sloped design to minimize ligature points. When combined with our 621-CP shower head, this system provides a new, ligature resistant, and durable solution.

TempShield™ Thermostatic/Pressure Balancing Valve

The TempShield thermostatic/pressure balancing valve allows the user to select a precise water temperature for showering and will maintain that temperature regardless of fluctuations in incoming pressure or temperature. Tested and factory preset not to exceed 112° F, the TempShield helps safeguard against scalding.

Pressure Balancing Shower Systems

Automatically compensates for fluctuations in incoming hot and cold water pressure to provide a consistent, comfortable temperature. With a flow rate strong enough to support a shower head and hand spray, it's the perfect choice when you want to take a basic shower to the next level.

Thermostatic/Pressure Balance Shower Systems

Our thermostatic/pressure balancing shower valve provides extra protection from scalding and thermal shocks by constantly monitoring both the water temperature and pressure. The rotating handle control provides a wide comfort zone that can be gradually and precisely adjusted to regulate water temperature from cold to hot.

Automatic Drain Shower System

Thermostatic/Pressure Balance Shower With Automatic Drain

This system is designed to help reduce the growth of pathogens in the shower system by reducing stagnant water in the shower valve, pipes and hoses of the shower system. Drains integrated into the valve and hand spray hose automatically flush water out of the system after each use.

① Thermostatic/Pressure Balancing Shower Valve

Provides protection from scalding and thermal shocks by monitoring both the water temperature and pressure.

② Automatic Valve Drain

Available integrated into the round trim or as a separate drain installed below the valve. When the water is shut off, water drains automatically from the valve.

③ Automatic Hand Spray Hose Valve

The valve is integrated into the hose. After each use, water from the spray and hose is drained automatically.

Ligature Resistance

Chicago Faucets offers the added safety of ligature resistance with the durability of a heavy-duty, brass construction. The mixing handle on this system features a rounded and sloped design to minimize ligature points. When combined with our 621-CP shower head and our ELR Touch Free faucet – this system provides a complete, ligature resistant solution.

Build A Complete Shower System To Meet Your Specific Needs

We've made it easy for you to **build your own unique system** and receive everything you need for the job while **placing an order with a single part number.**

Build Your Shower System Model Number

Using the codes in the charts on this page:

1. Choose a valve type and then a valve style for Position 1.
2. Choose if you want a diverter valve for Position 2. (Only available with the PB1 valve. All other valves use "0").
3. Choose a shower head for Position 3.
4. If available, choose a tub spout for Position 4.
5. Choose a hand spray for Position 5.
6. Choose a code for a slide or grab bar in Position 6.

Position	1	2	3	4	5	6
Code	SH	-	X	-	X	X

Every space must have a code - either "0" or a number for your option choice.

We are a member of the U.S. Green Building Council and support the Leadership in Energy and Environmental Design (LEED) Green Building Rating System™, to measure the efficiency and sustainability of buildings in the U.S. and Canada. If you are trying to achieve LEED Certification for your building, our low-flow outlets, metering cartridges, and sensor-operated faucets can contribute points in these areas: Water Efficiency Credit 2: Innovative Wastewater Technologies and Water Efficiency Credit 3: Water Use Reduction.

We are proud to be a partner with WaterSense®, sponsored by the EPA and designed to protect the future of our nation's water supply by promoting efficiency and enhancing the market for water efficient products, programs, and practices.

We are a charter sponsor of the Alliance for Water Efficiency, a non-profit organization that is dedicated to the efficient and sustainable use of water. It brings together a diverse range of stakeholders to advocate water efficiency and conservation.
