## **INSTALLATION INSTRUCTIONS**

## **TOOLS NEEDED:**

## DO NOT USE:

- **1.** Insert bolts, head down, into mounting adjustment slots on floor flange.
- 2. Slide plastic retainer washer down threads to hold bolts in place. Place a new wax gasket (sold separately) onto bottom of toilet bowl.
- **3.** Line up holes in toilet base with bolts in floor flange. Place toilet on top of flange.
- **4.** Place brass washer, then nut on bolt. Carefully tighten. DO NOT OVERTIGHTEN or bowl may crack.

If new bolt caps are needed, use Fluidmaster Model 7115 or 7116.
