

Industrial Grade Portable Outlet Boxes and Coverplates

Leviton's line of temporary power solutions now includes industrial grade portable outlet boxes and coverplates. For applications ranging from industrial and processing plants to construction and maintenance to entertainment and theater, these durable boxes will help to deliver the power you need, where you need it.

Boxes are constructed of a high-performance UL Listed TPV. They maintain their integrity in most any temperature, are extremely resistant to harsh chemicals and exhibit excellent strength and resistance to fatigue.

Coverplates are constructed of Lexan®, providing great impact resistance and superior service life. And, flip-lid versions provide NEMA Type 3R protection (when not in use).

Boxes are available in single and two-gang sizes, both feed-thru and pendant style. Coverplates are available in a wide range of configurations to fit just about any requirement. Plus, you can choose either high-visibility yellow (for most industrial and commercial applications) or black (for entertainment applications).
