

IDC **SELECT®**

Radial Ball Bearings

Quality Products. Right Price. Right Now.

IDC Select® radial ball bearings are produced to strict specification tolerances that are designed to meet or exceed USA industry standards.

- All products are 100% noise tested to meet factory electric motor quality noise levels
- Radial series 6000-6200-6300 are produced as standard C3 clearance and supplied with 25-35% fill with Polyrex™ EM grease or equal
- All bearings are heat stabilized to 250° F
- Grade 10 balls used on small sizes, up to 50 mm bore and grade 25 balls on sizes over 55 mm bore
- Produced with SAE 52100 steel, sizes offered in stainless steel are produced with 440C steel
- Seals are produced from NBR rubber with a steel backing

Ask your local AD Distributor about their broad inventory of high quality, competitively priced IDC Select® products.
