

Atlas-X1™ Flat Shielded White QuickPort™ Patch Panels

APPLICATION

Atlas-X1 Shielded Flat QuickPort Patch Panels protect critical data from EMI (electromagnetic interference) and RFI (radio frequency interference). This makes them ideal for use in health care, manufacturing, and other environments where EMI and RFI may be present. Atlas-X1 Shielded Flat QuickPort Patch Panels are available in 24 and 48 ports and include a high-density option for applications where space is limited.

4S255-WS4

4S255-WS8

SPECIFICATION

Patch panels shall have a white painted finish with numbers above or below each port. Patch panels shall be available in either 24- or 48-port configurations and shield data from electromagnetic and radio frequency interference. Panels shall meet or exceed ANSI/TIA-568.1-D, ANSI/TIA-1096-A, and IEC 60603-7.

FEATURES

- Shielding provides EMI/RFI protection and data security
- Panels feature a stainless-steel plate to provide grounding continuity between connectors and panel
- Standard-density panels include star washers and grounding lug for flexibility in panel grounding
- High-density panel includes hardware to accept standards compliant grounding connectors

DESIGN CONSIDERATIONS

- Verify rack is grounded according to commercial building grounding and bonding requirements for telecommunications
- Mounts on 19-inch equipment racks
- Rear cable manager not included, sold separately (49005-CMB)

STANDARDS & REGULATIONS

- ANSI/TIA-568.1-D
- ANSI/TIA-607
- ANSI/TIA-1096-A
- IEC 60603-7
- ETL with third-party verification

MECHANICAL SPECIFICATIONS

Capacity:	24-, 48-port
Materials:	16 AWG, white powder coating
Dimensions:	See page two
Mounting:	19-inch rack mount

COUNTRY OF ORIGIN

Taiwan
