

Sloan® Model OPTIMA® Sensor Activated Flushometers 140-1.28 2-10 3/4 LDIM WB ESS DFB

▶ Code Number

3771111

Description

Concealed, Sensor Operated Sloan® Model Water Closet Flushometer, enclosed behind a 13" x 17" Wall Box with Stainless Steel Access Panel, for floor mounted back spud bowls with exposed back spud.

► Flush Cycle

1.28 gpf/4.8 Lpf

Specifications

Quiet, Concealed, Diaphragm Type, Rough Brass Closet Flushometer with the following features:

- 1" I.P.S. Wheel Handle Bak-Chek® Angle Stop
- User friendly three (3) second Flush Delay
- OPTIMA® EL-1500 Self-Adaptive Infrared Sensor with Indicator Light
- 13 1/2" x 13 1/2" Wall Box with Stainless Steel Access Panel and Vandal Resistant Screws
- Adjustable Tailpiece
- High Back Pressure Vacuum Breaker Flush Connection, Spud Coupling and Flanges for 1½" Exposed Back Spud
- Non-Hold-Open Integral Solenoid Operator, Fixed Metering Bypass and No External Volume Adjustment to Ensure Water Conservation
- High Copper, Low Zinc Brass Castings for Dezincification Resistance
- Chrome Plated Exposed Flushometer Parts
- Courtesy Flush® Override Button
- Flush accuracy controlled by CID® technology
- High Chloramine Resistant PERMEX® Synthetic Rubber
 Diaphragm with Linear Filtered Bypass and Vortex Cleansing
 ActionTM
- Diaphragm, Stop Seat and Vacuum Breaker to be molded from PERMEX® rubber compound for Chloramine resistance

Valve Body, Cover, Tailpiece and Control Stop shall be in conformance with ASTM Alloy Classification for Semi-Red Brass. Valve shall be in compliance with the applicable sections of ASSE 1037 and ANSI/ASME 112.19.2.

Variations

2-10 3/4 LDIM

WB - For installation with Sloan Easy Access® Wall Box

DFB Dual Filtered Fixed Bypass Diaphragm

► Accessories (Sold Separately)

- □ EL-154 120 VAC/24 VAC, 50/60 Hz (50 VA) Box Mount (will operate up to 3 faucets)
- ☐ Transformer (240 VAC/24 VAC, 50 VA) EL-342
- See Accessories Section and OPTIMA® Accessories Section of the Sloan catalog for details on these and other OPTIMA® Flushometer variations.

▶ Economical

Automatic operation provides water usage savings over other flushing devices. Reduces maintenance and operation costs.

► Automatic Operation

Sloan OPTIMA® equipped Flushometers provide the ultimate in sanitary protection and automatic operation. There are no handles to trip or buttons to push. The Flushometer operates by means of an infrared sensor that adapts to its surrounding. Once the user enters the sensor's effective range and then steps away, the Flushometer Solenoid initiates the flushing cycle to flush the fixture.

► Hygienic

User makes no physical contact with the Flushometer surface except to initiate the Override Button when required. Helps control the spread of infectious diseases.

▶ Practical

Solid state electronic circuitry assures years of dependable, troublefree operation. The operational components of the Flushometer are identical to a handle activated Royal® Flushometer, proven by over 100 years of experience.

▶ Made in the U.S.A.

▶ Compliance & Certifications

This space for Architect/Engineer Approval

Sloan® Model OPTIMA® Sensor Activated Flushometers 140-1.28 2-10 3/4 LDIM WB ESS DFB

Wall Box Specifications

- EASY ACCESS® Wall Box Assembly Part #EL-192-A
- Frame: 13" x 17" x 4" (330 mm x 432 mm x 102 mm) #16 Gauge
 Steel
- Cover (Access Panel): 14½" x 18½" (368 mm x 470 mm) #15
 Gauge #304 Stainless Steel, #4 Finish
- Screws: (6) #8-32 x 3/4" Drilled Spanner Head Spanner Bit Provided

▶ Control Circuit

- Solid State
- 3 Second Flush Delay
- 24 VAC Input
- 24 VAC Output

16 Second Arming Delay

▶ Solenoid Operator

24 VAC, 50/60 Hz

▶ Transformers

Sloan Part #EL-154 120 VAC, 50/60 Hz Primary 24 VAC, 50/60 Hz Secondary Class II, UL Listed, 50 VA.

Sloan Part #EL-342 240 VAC, 50/60 Hz Primary 24 VAC, 50/60 Hz Secondary Class II, UL Listed, 50 VA.

▶ L Dimension

Specify the "L" Dimension for the proper length of the Handle Assembly and Flush Connection. The "L" Dimension is equal to the Wall Thickness (to the nearest whole inch) plus 23/4" (70 mm).

Sensor Range

Nominal 22" - 42" (559 mm - 1067 mm) Self-adaptive Window: \pm 10" (254 mm)

▶ OPERATION

1. A continuous, invisible light beam is emitted from the OPTIMA Sensor.

2. As the user enters the beam's effective range (22" to 42") the beam is reflected into the OPTIMA Scanner Window and transformed into a low voltage electrical circuit. Once activated, the Output Circuit continues in a "hold" mode for as long as the user remains within the effective range of the Sensor

3. When the user steps away from the OPTIMA Sensor, the circuit waits 3 seconds (to prevent false flushing) then initiates an electrical "one-time" signal that operates the Solenoid. This initiates the flushing cycle to flush the fixture. The Circuit then automatically resets and is ready for the next user.

► ELECTRICAL BOX INSTALLATION

Adjust the Mounting Bracket so that the Sensor sits flush against the Cover

Refer to the instructions packaged with the Flushometer for additional installation information

▶ WIRING DIAGRAM

One Transformer serves up to ten (10) OPTIMA Closet/ Urinal Flushometers. Specify number of transformers required accordingly.
