The Most Trusted Name in Pumps and Meters

## NEW PRODUCT ANNOUNCEMENT

### Multi-Plane Swivels

#### MULTI-PLANE SWIVELS ARE NOW AVAILABLE

We are pleased to announce that multi-plane swivels are now available from Fill-Rite® in 3/4" and 1" sizes. They have a high-flow design for great performance and are compact and lightweight for easy handling. The body is constructed of a high aluminum zinc alloy with a fluorosilicone inner O-ring and a fluorocarbon outer O-ring.

We also want to bring your attention to the new packaging. We have moved away from our clamshell packaging in favor of a Fill-Rite branded blister pack. This change allows for more product information on the packaging as well as a better view of the product. We think it is a much better look for your displays and should help sell more swivels!

#### Some of the key features include:

- Double O-ring seals at each swivel for long life at low temperatures (-40° F/C)
- Compatibility with unleaded gasoline, diesel and ethanol blends through E10
- Full 360° spherical rotation for easy movement

**Date of bulletin:** Nov. 19, 2012
