

OVAL HEAD SPANNER TAMPER-RESIST MACHINE SCREW – 18-8 STAINLESS STEEL

The following Specification Sheet applies to all **Oval Head Spanner Tamper-Resist**Machine Screw – 18-8 Stainless Steel in our TP8 series.

	Head Diameter		Н	С	0	М	Р
Size			Head Side Height	Head Crown Height		Center to Center	Recess Gaging Depth
	Max.	Min.	Ref.	Ref.	Ref.	Ref.	Ref.
6	.262	.238	.083	.045	.128	0.125	0.062
8	.312	.285	.100	.052	.152	0.156	0.07
10	.362	.333	.116	.060	.176	0.187	0.078
12	.412	.380	.132	.068	.200	0.218	0.086
1/4	.477	.442	.153	.079	.232	0.25	0.094

Description	Screws 6" and shorter are fully-threaded. Screws 6" and longer are 3/4 threaded
Applications/ Advantages	Spanner Screws require a specialized hand driver or bit to install and remove
Material	18-8 Stainless Steel

Description	A straight shank fastener with external threads designed to go through a hole or nut that is pre-tapped to form a mating thread for the screw.									
Applications/ Advantages	Machine screws form a fastening superior in strength to spaced thread screws.									
	Steel		In some applications, aluminum machine screws can be a less expensive alternative to stainless screws because of their resistance to corrosion and high rate of conductivity. Aluminum machine screws should be fastened with aluminum nuts to minimize the chance of galvanic corrosion.							
	Steel Zinc is the most common and most popular variety of steel machine screws Steel Zinc yellow screws are popular in electronics applications. Steel Zinc Black and Black Oxide screws are used to blend in with black-colored components.	18-8 Stainless steel mac require general atmosphe machinery and refrigeration in withstanding some elevated machiness steel offers superior at maintain 410 Stainless steel is retensile strength is needed in high stress. 410 is not as continuous steel in the stress. 410 is not as continuous steel in the stress. 410 is not as continuous steel in the stress. 410 is not as continuous stress. 410 is not as continuous stress.								
Material	AISI 1006 - 1022 or equivalent steel.	SAE 18-8 stainless steel	316 stainless steel	410 stainless steel	2024-T4 alloy					
Hardness	Rockwell B70 - B100.	Rockwell B85 - B95 (approximate)*	Rockwell B85 - B95 (approximate)*	Rockwell C34 (approximate)	1.5.					
Tensile Strength	60,000 psi. minimum.	80,000 psi. minimum (100,000 psi after cold working)*	85,000 - 140,000 psi.	180,000 psi.	62,000 psi. minimum					
	Steel machine screws which have a nominal diameter smaller than #4 are not subject to tensile testing. No. 4 and No. 5 machine screws which are shorter than 1/2" are not subject to tensile testing. Steel machine screws of diameters No. 6 to 1/2" inclusive, which are shorter than either 1/2" or 3D (where D is the nominal screw size in inches) are not subject to tensile testing. Such steel machine screws of a size to be tested shall meet the tensile load requirements listed above. Tensile strength values for stainless screws are offered as approximations only; there is no single standard for the performance requirements of stainless machine screws.									
Plating	See Appendix-A for information on the plating of steel machine screws	Stainless machine screws a	Aluminum machine screws are usually supplied without any additional finish.
