

Multi-Pleat™ XL8

MERV 8 Extended Surface Pleated Panel
Filter with Mechanical Media

Features

- Upgrade from standard pleated filter
- MERV 8 and MERV A8 performance rating
- Mechanical MERV 8 media is not reliant on electrostatic charge for efficiency
- Low resistance to airflow
- High dust holding capacity
- Sturdy double-wall frame design
- Moisture resistant beverage board frame
- Standard and high capacity models
- Available in 1", 2", 4" and 6" depths

Multi-Pleat XL8 Mechanical MERV 8

The Koch **Multi-Pleat XL8** is a medium efficiency extended surface pleated panel filter, engineered to provide higher initial efficiencies and overall superior performance than standard pleated filters. The **Multi-Pleat XL8** carries a MERV 8 and MERV-A 8 performance rating in accordance with ASHRAE Test Standard 52.2-2007.

The MERV 8 and MERV-A 8 performance rating provided by the **Multi-Pleat XL8** make the filter an excellent upgrade from disposable filters and standard MERV 6 and 7 rated pleated filters. The **Multi-Pleat XL8** is the best selection in applications such as hospitals, laboratories, pharmaceutical plants, commercial office buildings, and in any system in which a higher degree of indoor air quality is required.

Multi-Pleat XL8 Construction

The **Multi-Pleat XL8** media is produced with an optimal blend of highly specialized fibers, developed by Koch Filter specifically for use in extended surface air filters.

Developed to deliver a “one of a kind” performance, this specialized media operates on mechanical filtration principles which provide high efficiency, low pressure drop and high dust holding capacity.

The Koch Multi-Pleat XL8 maintains a MERV 8 performance rating before and after conditioning steps when tested in accordance to ASHRAE Test Standard 52.2-2007 and 52.2-2007 Appendix J.

Two Media Area Capacity Levels

Standard Capacity **XL8-SC** filters provide a combination of efficiency, economy, and excellent overall performance. Standard Capacity XL8 filters are an excellent choice in applications where filter change schedules are based on preventive maintenance schedules.

High Capacity **XL8-HC** filters are similar in construction to the Standard Capacity but have the added advantage of approximately 30% more media. The additional media results in extended filter life, making the XL8-HC the ideal filter for use in filtration systems where filter change schedules are predicated on recommended final pressure drop readings.

Notes:

- MERV (Minimum Efficiency Reporting Value) • Recommended Final Pressure Drop is 1.0" w.g.
- Performance data is based on ASHRAE Test Standards 52.1-1999 and 52.2-2007. • Recommended maximum continuous operational temperature is 200° F.
