TECHNICAL DRAWINGS ARE APPROXIMATE ACTUAL SIZE

RIVET TYPE

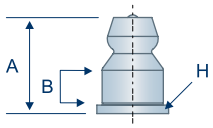

EXCEEDS 72 HR SALT SPRAY.

SAE J534

Rivet type fittings are designed for thin materials and special applications, such as on kingpins, where a conventional threaded or drive type fitting cannot be used or where a shank protruding into a component is unacceptable. Rivet type fittings are driven into place from behind. This unique fitting resembles a rivet in form only, and is not intended to be used as a fastener. Please note: The nipple design is covered by SAE J534, while the rivet style is not.

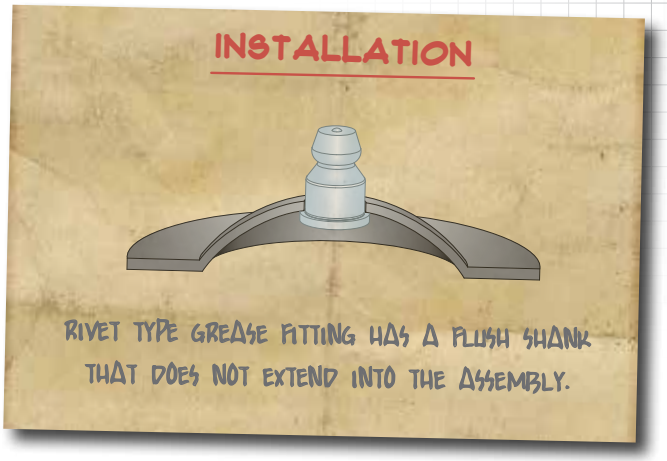

H1675Z3

Straight Rivet Type
≈ 5/16" Drill Size

DRILL SIZES PROVIDED ARE APPROXIMATIONS ONLY

Item #	Drill Diameter	Angle (E)	Overall Length (A)	Shank Length (B)	Overall Width (D)	Swing Clearance (G)	Shoulder Diameter (H)	Ball Check?
H1675Z3	≈ 5/16" Drill	Straight	.50"	.15"	—	—	3/8"	Yes

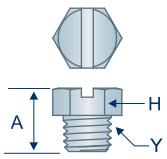

SPECIAL PLUGS

SAE J534

Plugs are often used in gear boxes that have vacant holes and need to be sealed to prevent debris from entering the gear box. Plugs come in a variety of head styles to fit any industrial or agricultural application. The H700337Z3 is a thread forming plug and is designed for an opening with damaged threads or holes with no threads.
