TECHNICAL DRAWINGS ARE APPROXIMATE ACTUAL SIZE

FLUSH TYPE

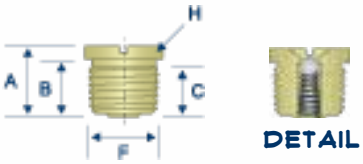

EXCEEDS 72 HR SALT SPRAY.

SAE J534

Flush type fittings are for applications where a protruding greasing nipple may be impractical. The compact design of the flush type fitting allows for use on shafts, pulleys and other rotating assemblies. Large diameter flush type fittings are ideally suited for high volume applications. Larger flush type fittings are used in many of the same applications as button head fittings, and are more resistant to damage due to their low profile design.

H1815

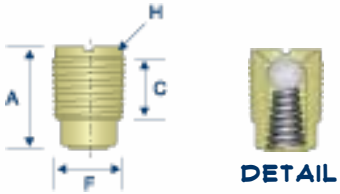

Straight Flush Type
1/8"-27 NPTF

1815 SLOTTED

H1452

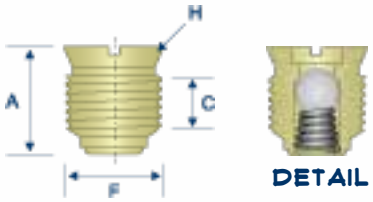

Straight Flush Type
1/8"-27 NPTF

1452 SLOTTED
