

Features

- Innovative design simplifies installation - no more loose hardware!
- Standard electro-zinc plated finish is cleaner, provides superior corrosion protection
- Currently available in 1/2" thru 12" steel pipe sizes
- Also available in a copper-plated finish for supporting copper tubing
- Conforms with Federal Specification WW-H-171 (Type 8), Manufacturers Standardization Society (MSS) SP-58 and SP-69 (Type 8)

Patent Pending

The 510 riser clamp is UL Listed under UL 203 for fire protection applications (2" thru 8" sizes)

The new 510 riser clamp from ERICO® is the latest innovation designed to simplify installations when suspending vertical steel pipe risers. The 510 riser clamp has slotted holes to allow easy installation without requiring hardware removal, meaning no more lost time looking for dropped nuts or bolts. This innovative riser clamp installs in a fraction of the time of a standard riser clamp.

The special serrated flange-head bolts eliminate the need for wrenches on both the bolt and nut. Just hold the bolt in place with your finger and tighten the nut from the front side – where it's most accessible. The electro-zinc plated finish on the 510 riser clamp provides superior corrosion protection.

Installation is easy...

1. Separate Clamp

2. Hold bolt in place while aligning clamp

3. Tighten the nut

Part Number	Nominal Pipe Size	A	B	HS	Max. Rec. Load (lbs)
