

F-SERIES DOUBLE GANG BOXES & COVERS

New F-Series Double Gang Boxes & Covers – A Perfect Fit!

*Boxes and Covers
Universally Compatible*

NEW PRODUCT SHOWCASE

Kraloy's line of F-Series double gang boxes, weatherproof covers and cover plates have all been re-designed with universal product compatibility in mind, giving contractors greater ease of installation and cost savings on the job site.

Boxes

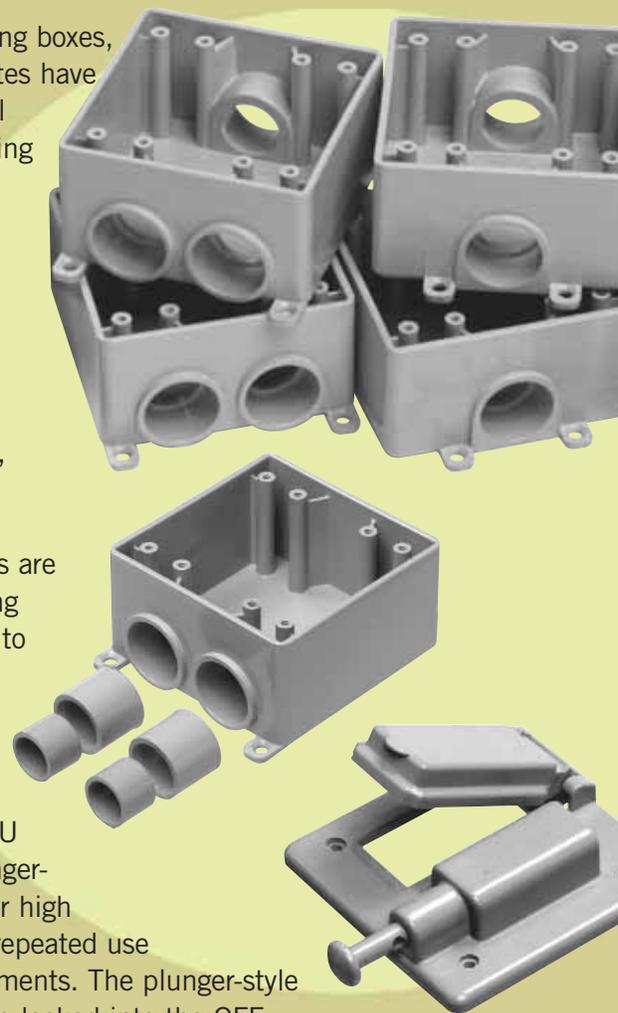

The FS and FD blank gang boxes are up to 1" deeper than other manufacturers' double gang boxes, allowing for increased space for installation of receptacles and switches. And, the FS-Series boxes are molded with 1" conduit hubs, along with 3/4" and 1/2" reducer bushings to accommodate various sizes of conduits.

Covers

The VSRC20-2-U and VSDR20-2-U weatherproof covers feature a plunger-style switch, making them ideal for high torque, motor-rated switches and repeated use in harsh and cold weather environments. The plunger-style switch also has the capability to be locked into the OFF position to avoid accidental switching.

What's more, the weatherproof covers have been designed to ensure a watertight seal using the new foam gasket, with an adhesive layer for ease of installation.

The F-Series double gang boxes and covers are certified to UL standard 514C – Non-Metallic Outlet Boxes, Flush Device Boxes, and Covers.
