Color-Keyed®

COPPER COLOR-KEYED® CONNECTORS

PARALLEL SPLICE

GENERAL INFORMATION

- Made of high conductivity copper, electro-tin plated.
- UL listed for copper code cables.
- An inspection peep hole provided to ensure adequate cable insertion.

 **WARNING** 
DO NOT APPLY TO LINES WHILE ENERGIZED!

INSTALLATION INSTRUCTIONS

1. Strip the insulation from cable to length equal to half connector. Be careful not to nick cable strands which may later result in strands breaking.
2. Cable end should be clean, wire brush and insert into connector until it stops. The insertion length must approximate the stripped length of cable. Inspect the cable through peep hole to insure both conditions.
3. Table on reverse side contains installing die and the number of compressions required for each die connector combination. Insert connector in die and compress between markings beginning near the tongue of the connector.

 **CAUTION** 
Using improper installing die may result in a defective connection.

4. After crimping, remove all sharp edges, flash or burrs due to crimping dies.
